

OrderedDict

```
classDiagram
    class OrderedDict
    class CacheItem["aestate.work.cache.CacheItem"] {
        +__init__()
    }
    CacheItem --|> OrderedDict
```

The diagram illustrates a class hierarchy. At the top is the 'OrderedDict' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'OrderedDict', while the two lower compartments are empty. Below it is the 'aestate.work.cache.CacheItem' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'aestate.work.cache.CacheItem', the middle compartment is empty, and the bottom compartment contains the method signature '+ __init__()'. A blue arrow with an open triangular head points from the top of the 'aestate.work.cache.CacheItem' class to the bottom of the 'OrderedDict' class, indicating that 'aestate.work.cache.CacheItem' inherits from 'OrderedDict'.

aestate.work.cache.CacheItem

+ __init__()
